SUMMARY

Aspiring Data Analyst building hands-on experience through a structured internship and independent projects in SQL, Python, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis, dashboard development, and translating complex datasets into clear, actionable business insights for stakeholders.

EDUCATION

St. Xavier's College, Ranchi

Graduated: June 2024

Bachelor of Commerce | CGPA: 8.50

EXPERIENCE

Data Analytics Intern, Internship Studio

Dec 2025 - Mar 2026 (Remote)

Structured data analytics training program culminating in a capstone project [↗](#)

- **Built a customer retention risk assessment** across 500K+ retail transactions, as shown by applying Python (Pandas, NumPy) and Power BI to run EDA, RFM segmentation, cohort, and time-series analysis and surface behavioral anomalies.
- **Delivered stakeholder-ready reporting** through a 3-page interactive Power BI dashboard tracking sales, customer, and retention KPIs, as shown by uncovering stable monthly revenue (170K-180K) that masked underlying engagement anomalies.
- **Surfaced a critical retention insight for leadership**, as measured by 91% inactive and 87% disengaged high-value customers, by running custom analysis and translating findings into data-driven recommendations.

PROJECTS

Marketing Funnel Analysis | Python, SQL [↗](#)

- **Built a user-level funnel model** across 90,400 users and 5 relational tables using Python and SQL, as measured by an overall purchase conversion rate of 0.50%.
- **Calculated stage-wise conversion rates** of 50.00%, 13.34%, and 7.50%, as shown by 92.50% abandonment at Payment → Confirmation and the largest absolute loss of 39,170 users at Search → Payment.
- **Developed reusable SQL views** for funnel, device, and monthly analysis, achieving 100% reconciliation across source tables and finding 66.6% of users on Desktop underperformed Mobile in later funnel stages.

Ecommerce Analytics | Python [↗](#)

- **Analyzed 9,994+ e-commerce transactions** using Python to uncover revenue drivers, as shown by identifying Office Supplies as the fastest-growing category (+62.1%) and Technology as the top revenue generator (\$836K+).
- **Built an RFM customer segmentation framework** classifying customers into 10 actionable segments, as measured by over 35% falling into At Risk, Lost, Churned Loyal, and Churned Frequent categories.
- **Produced structured analysis documentation** for stakeholder use, as shown by consolidating sales analytics, RFM segmentation, and forecasting findings into business-ready reports, including 22,906 Office Supplies units sold and 62.1% category growth.

HR Business Intelligence Dashboard | Power BI [↗](#)

- **Designed an interactive HR analytics dashboard** evaluating 1,470 employees, as measured by identifying a 16% attrition rate, by leveraging Power BI and DAX to surface workforce trends.
- **Built 4 business-focused dashboards** housing 15+ KPIs, as shown by enabling interactive analysis across diversity, engagement, compensation, and retention for HR stakeholders.
- **Delivered actionable workforce insights**, as measured by uncovering a 60:40 gender representation split and a 2.7/4 average satisfaction score, by analyzing promotion patterns to highlight targeted improvement opportunities.

TECHNICAL SKILLS

Programming & Querying: SQL, Python

Data Analysis & Visualization: Microsoft Excel, Power BI, DAX

Analytics: Data Cleaning, Data Wrangling, Data Preparation, EDA, Dashboard Development, Reporting, KPI Analysis, Trend Analysis, Anomaly Detection, Data Interpretation, Business Intelligence
